

Please do not allow the National No-Call (privacy) List supersede the Indiana state law now in place. It is wonderful not to be receiving numerous telemarketing calls, our Indiana law is a "god sent". Earlier in the year I moved and my phone number changed, the old phone number was on the No-Call List. Once my new phone was installed I received probably 10 calls per day from some telemarketer and actually one call is too many. My new phone number was added effective October 1st and the calls are minimal. SO, please DO NOT pass a National policy to supersede a individual State Law already in place.
